

PARTH SARTHI

AI/ML & Full-Stack Developer | Student Community Leader

Ghaziabad, India · +91 9229263192 · sarthiparth2006@gmail.com · [LinkedIn](#) · [GitHub](#)

SUMMARY

B.Tech Computer Science (AI/ML) student and full-stack builder using AI-assisted development to build, debug, and ship software. Finalist in the USAII Global AI Hackathon 2026 (Rank #43/424). Student community leader with experience organizing events, running workshops, and mentoring peers.

CLAUDE & AI-ASSISTED DEVELOPMENT

- Uses Claude daily as a development and problem-solving partner while building hackathon and personal projects — exploring technical approaches, understanding unfamiliar concepts, debugging, and reasoning about architecture.
- Applied AI-assisted development workflows under real hackathon time constraints while building VIGIL, iterating on solutions across a full-stack, multi-agent codebase.

PROJECTS

VIGIL — Full-Stack AI Infrastructure Monitoring Platform — *Far Away 2026 Hackathon* 2026

- Designed a modular multi-agent architecture for autonomous monitoring of critical infrastructure, built with a React dashboard and FastAPI backend.
- Advanced to Round 2 of the Far Away 2026 hackathon.
- Built RailMind, a module for railway sensor-data ingestion, anomaly classification, and AI-assisted corrective-action recommendations, alongside OrbitMind, an aerospace-monitoring module on the same architecture.
- Used Claude throughout to debug implementation issues, resolve merge conflicts, and iterate quickly across the ML pipeline and AI agent layer.

LifeLens — AI-Powered Career & Education Decision Support Tool — *USAII Global AI Hackathon 2026 Finalist 2026*

- React, Node.js, AI API Integration, Prompt Engineering — designed the AI decision workflow, prompt architecture, and comparison framework for evaluating career and education paths.
- Led the final-round pitch and presentation, earning Official Finalist recognition; Rank #43/424 (Top 10%) in the USAII Global AI Hackathon 2026.

Praniti — AI-Based Citizen Science Platform for Hyperlocal Air Quality Monitoring 2026

- Co-developed an AI citizen-science concept estimating neighborhood air quality from leaf imagery; contributed to workflow and system design.
- Stage: Concept — Invention Disclosure Draft (not filed)

LEADERSHIP & COMMUNITY

The खेल Society — Core Member & Treasurer — *Hi-Tech Institute of Engineering and Technology*

- Served as Core Member and Treasurer for a five-wing college sports society — Cricket, Football, Badminton, Volleyball, Esports.
- Organized 4 large-scale sports events, managing logistics, team coordination, and on-ground execution, plus event payments and reconciliation.
- Built a polished, animated orientation presentation for the society, including custom logo processing and a presenter navigation mode.

Entrepreneurship Cell — *Former Member*

- Helped organize multiple student-focused workshops and events, supporting participant coordination and on-ground execution.

Teaching & Mentoring

- Tutored school students, adapting explanations to different learning levels and simplifying concepts through clear, approachable communication.

TECHNICAL SKILLS

Languages: C++, JavaScript, Python, HTML, CSS

Frontend: React.js, Responsive Web Development

Backend & APIs: Node.js, Express.js, FastAPI, REST APIs

Data & Cloud: MongoDB, Firebase/Firestore, Supabase

AI/ML: AI/ML Applications, AI Agents, AI-Assisted Development with Claude

Other: Git, GitHub, Vercel, API Integration, Technical Documentation

ACHIEVEMENTS

- Participant — Smart India Hackathon (SIH) 2026.

EDUCATION

Hi-Tech Institute of Engineering and Technology

2025 – 2029

B.Tech — Computer Science & Engineering (AI/ML) | CGPA: 7.14 (after 2nd semester)

Class XII — 96.3%, Narayana Junior College (2024) | Class X — 93.6%, Don Bosco School (2022)
